

Bags & Pouches

DETAILS OF USE

Proper Positioning:

1. Position wristband below your wrist bone to keep shear handles from hitting your hand.
2. Left Handers wear it on their right arm & will need to turn the band to have better access to their tools.
3. Position first shear slot directly on top of your arm. Second shear slot to the side.
4. Push shears in all of the way!
5. Shears with a tension screw need to be turned to one side then back to enter the sleeve
6. Sanitize the wrist band with non-bleach, medical-grade anti-bacterial wipes such as Barbicide between each client

FAQ

Will I stab myself?

Your forearm does not bend so shears stay parallel to your arm

Will the shears fall out?

As long as the shears are pushed in the sleeve all of the way, they will not fall out. You can feel the pull of the magnet.

Tool Apron, with bling, genuine leather, with crystal shear Armorizer®
