#### tint me: permanent colour system

In these difficult economic times, salons demand a suitable colour solution: well -priced tints without compromising quality! HH&B are pleased to announce that we have met this challenge for the **tint me** range by creating a range that offers only the top 42 shades that sell the best at the most affordable price.

Because the **tint me** range is only made up of the best-selling permanent shades, we have been able to pass on substantial savings. This has allowed us the price this 100ml tint at the most affordable price possible. The newly introduced 180ml tubes gives a further cost saving of up to 30%! The colour is made in Italy by a world-class manufacturer with no compromise in the quality. It will perform to the highest expectations as only the best ingredients (Pure Micro Pigments) & the lowest levels of ammonia possible have been used. **tint me** is compatible with our CDC range of tints, giving you the flexibility to mix special colours as required.

24 Permanent Colour

hair health & beauty

Professional MULTI-CHROMATIC, TRANSLUCENT colour for shinier, brighter, natural & modern hair at half the processing time.

# PROFESSIONAL BIGGEST FASTEST SAFFST PROFESSIONAL HAIR COLO INTHEWC )FINI<sup>-</sup>

Super-sized at 200ml for cost effective savings, to minimize waste & environmental sensitivity. Super-fast processing saving up to half the normal processing time for your time-sensitive clients who demand EXPRESS SERVICES.

## Beautiful Intelligent Genuine

Advanced, secure, performance focused, professional chemical service formulations & technologies

#### PROFESSIONAL POINTS OF DIFFERENCE

Not all professional hair color is created equal... There are thousands of professional hair color brands. Most are very similar. BIG PRO. is the new standard for the following 4 reasons:

#### 1. The Safest Hair Color Formulations

NH3 CONTROL AMMONIA ENCAPSULATION TECHNOLOGY Reduces ammonia inhalation & irritation by up to 90% POLY-FORCE BOND SCIENCE (BOND-REDUCTION) PROCESS TECHNOLOGY Lifts & deposits without chemical bond breakage or damage

## 2. Non-Progressive Hair Color that Processes in Half the Time

Thanks to new technologies we are witnessing grey coverage in as fast as 10 minutes (without chemical accelerators)

#### 3. Logical & Ecological

Professional sized products for professional use onlyReduces bulk packaging waste by more than 75%Color Tube:200mlDevelopers:3000mlPowder Bleach:2500g tubBleach Paste:1000g tubDirect Colors:1000mlShampoo & Conditioner:3000ml tubs

#### 4. Practical & Cost-Effective

The professional colorist can create everything to satisfy the clients' needs while cutting inventory by up to 80% 39 Shades, 5 Developers, 2 Bleach Types, 10 Direct Colors, 9 Permanent Toners & 4 Black Bar Treatments

#### **CLIENT BENEFITS**

Lowest Ammonia, Purist Ingredients, Beautiful Color, Fabulous Hair with Comfort & Safety Benefits for you & for your clients! 12 CLIENT BENEFITS:

When speaking with a client regarding BIG PROFESSIONAL, speak to them about the benefits, not the features. While features & technologies are important, benefits relate the features & technologies to the client.

#### 1. Healthier Color Services

Lets be honest, there are no organic or natural oxidation hair colors or lightening services.

Effective permanent, semi & demi-permanent cosmetic hair colorings are chemical services.

BIG PRO offers safe hair color & lightening alternatives.

#### 2. No More Tears from Ammonia Vapours

Ammonia Performance. YES Ammonia vapors. NO! BIG PRO technologies reduce up to 90% ammonia vapor inhalation & irritation

#### 3. Beautiful Color in Half the Time

Chances are your clients took time off from work or family needs to make their appointments.

Thanks to BIG PRO technologies, colorists have the option to produce beautiful hair color in half the time of standard hair colors.

#### 4. Reduced Exposure

Scientists claim that under ideal conditions, the average healthy persons capacity to defend against substantial chemical absorbtion during oxidation processing is approximately 15 - 20 minutes. BIG PRO's standard processing times are approximately 15- 20 minutes.

#### 5. Improve Elasticity & Shine by Coloring your Hair

BIG PRO's bond building formulas & ABk-C Complex add extra strength & shine to lacklustre, listless hair.

#### 6. Personalize Your Color

Color formulas aren't one-size-fits-all! BIG PRO was created to mix & blend for hand-tailored color services, as opposed to one, flat, all-over color from a single tube or box.

#### 7. The More you Color the better your Hair looks & feels

Clients truly feel & see the difference as their hair quality greatly improves over time using BIG PRO.

#### 8. Natural Looking Translucency with Softer Growouts

The natural, multi-chromatic appearance of BIG PRO colors tend to grow out with softer blended lines of demarcation.

#### 9. No More "Just Tinted My Hair" Smell or Waxy Feel

BIG PRO colors easily wash & rinse free from the hair, leaving ZERO chemical or waxy residues. Hair feels & smells clean, fresh & natural.

## 10. Dermatologically Tested on Humans, Verified Safe & Secure

BIG PRO is Fragrance-Free, Gluten-Free, SLS-Free, Paraben-Free, Silicone-Free, Vegan Friendly. Pure. Clean. Simple & Functional.

#### 11. More Savings, More Compliments

Following your stylist's BIG PRO prescription for color & maintenance, you will actually find you spend less time & money to look better than if you did your hair at home.

#### 12. Anti-Age Color for your Hair

As we age hair tends to get wiry, grey, dry & dull with less elasticity & difficult to color.

BIG PRO technologies fight free radicals, & subtly soften, cover, color, brighten & tone for a natural, lustrous, youthful appearance.

## NH3 CONTROL

AMMONIAENCAPSULATIONTECHNOLOGY

### **INTERNATIONAL PATENT**

This patented technology electromagnetically attracts, encapsulates and locks the Ammonia molecules and the emerging vapors into the color cream at the moment of activation with the BIG OXY BUTTER Developers.

The encapsulated ammonia is then transported directly to the hair shaft where it gently and naturally opens the cuticles while acting as a catalyst enhancing the pigmentation process.

Once the color development is completed the water-soluble ammonia is easily carried away by water leaving no ammonia residues and no unpleasant irritating vapors or odors.

### AMMONIA VAPORS RELEASE COMPARISON BETWEEN MAIN COMPETITORS

THE RED LINE REPRESENTS THE LEVEL OF HUMAN PERCEPTION TO THE PRESENCE OF AMMONIA VAPORS; below the red line humans are unaware to the presence of ammonia vapors. The GREY AREA represents high levels of toxicity.

#### BIG PROFESSIONAL Colour Range: REVOLUTIONARY SCIENCE. A World First!!

BOND REDUCTION: This advanced technology gently reduces the hydrogen bonds, ionic bonds & disulphide bonds within the hair's polypeptide structures, facilitating pigment penetration without breakage or damage to the bonds.

#### The Big Professional Color cream contains 98.9% pure, ultrarefined color pigments which instantly enter, cluster & fuse with the hair's amino acid keratin protein structures.

This results in superior grey coverage, longevity of colour & improved condition of the hair. Deeper penetration of the pigment & superior lift & deposit ensures true-to-colour-chart results that last.

## **BOND-REDUCTION**

RIG

TARGETED HAIR REPAIR enriched with A-BkC Complex. This Amino Btonik Conditioning Complex made of essential oils & botanic extracts:

- Recreates cuticles & seals in colour
- Smoothes static & frizz

## BIF

#### BIG OXI BUTTER VELVETY LUSH DEVELOPERS perform a 5-Phase Fusion Action during the color process

- 1. Activates the ammonia & oxidative actives within the colour cream.
- 2. Assists with the encapsulation of the ammonia & developing vapours at the moment of oxidation.
- 3. Delivers the active ingredients directly to the hair shaft where it reacts in conjunction with the ammonia to lift & diffuse the natural pigments. 4. Assists with the development, delivery & linkage of the newly forming activated
- colour pigments deep into the cortex to the amino protein structures 5. The pigments are then linked & trapped in the spaces between the hair's peptide bonds for extended color vibrancy.

**BIG OXY BUTTER VELVETY LUSH DEVELOPER** 1%3VOL3L

13796 3%10VOL3L 13754 6% 20VOL 3L 13755 9%30VOL3L 13756 12% 40VOL 3L 13757

This conditioning cream lightener can easily & gently lift up to 6 levels, & is ideal for on scalp bleaching treatments as well as free-hand highlighting techniques. Built-in conditioning &

barrier oils protect while the ultralightening factors work on lifting the melanin molecules to the desired levels. The anti-yellow features work to

neutralize warm hues from inside-out, giving it excellent toning capabilities. The creamy emollient formula gives the colorist an unlimited array of lightening technical options & application control.

BIG CREAM BLEACH1+1 **DE-COLORATION 2.5KG** 13759

Recommended for gentle bleaching on medium to fine hair with lower volume % developers. Can be used for multiple applications.

**BIG COLOR DIRECT SEMI-PERMANENT** is an alkaline direct color conditioning system

The collection has ten concentrated shades

Depending on the amount of colour & technique used these luscious, joyous shades can produce amazing colours, change or intensify the natural base tone, create avant-garde effects or gentle natural pastels & highlights.

When you want to lighten the BIG Color Direct colour shades or create a pastel tone, mix the colour with the 000.Pastel White toner a small amount at a time in a bowl until the desired shade is achieved. To darken, intensify, deepen or create more matte colour tones, gradually add 111Black to the mixture until the desired richness is achieved.

.44 COPPER

This ammonia free, pH-balanced formula adheres well, does not swell or expand to assist in preventing or minimizing overlapping. The Micronized Blue Pigment Technology creates a unique combination of lightening + toning for visibly clearer & cooler blonde results.

BIG BLUE BLEACH1+2 DUST FREE 5KG 13758

Recommended for stronger lift on medium to coarse hair with higher volumes % of developer. Can use the multiple application method.

SUPER SONIC BOND BLEACH 1+2 A new powder lightener that ensures 8/9 levels of lift & outstanding protective properties.

This BOND BUILDING BLEACH leaves hair incredibly soft & the hair structure remains supple & elastic even after total lightening. Low ammonia, MEA-free formulation does not swell or expand preventing overlap. 2.5KG 14613

Bleach&Color<sup>®</sup> offers endless creativity, with the ability to lift up to 7 levels, while oxidation-resistant pigments deposit into the hair shaft.

#### Bleach&Color<sup>®</sup> permanent cream 80ml, 16 shades:

There are 3 main components that comprise Bleach&Color®

- Lightening upon application, Bleach&Color<sup>®</sup> Cream first acts as a decolorizer to remove the pigments present in the hair (both natural & synthetic)
- Depositing once the hair has been lightened appropriately, Bleach&Cream<sup>®</sup> Color cream begins depositing the new oxidation-resistant pigments into the hair
- Combined the lightening & depositing actions create an ideal environment for the new color pigments to bond with those remaining in the hair after lightening, while leaving the cuticle intact, ensuring minimal damage to the hair

#### HOW TO USE:

The mixing ratio is 1 part developer to 1 part BLEACH&COLOR<sup>®</sup>. (example: 30g of 30 volume developer + 30g Bleach&Color<sup>®</sup>) For best results, always use a scale to measure, & mix formula thoroughly until smooth.

Choose the right developer that suits the amount of lift required, either 20 volume, 30 volume or 40 volume.

40 volume is recommended for previously colored & level 5 or darker hair.

Cover the hair with foil, meche or a processing cap, & you may process under heat. Check the hair after 10-15 minutes to ensure the cuticle is not damaged. As long as the hair is not damaged, continue processing under heat, checking every

10 minutes (check green every 5-10 minutes), up to 50 minutes. Remove from heat & allow an additional 15 minutes for the color to deposit. It is extremely important to monitor the color progression.

IMPORTANT: The shades containing primarily blue pigment (blue, aquamarine, & green) are considered advanced shades & must be monitored very closely. If the green is left longer than intended, the blue pigment will become the dominant pigment & the hair will appear more blue than green. Once you have achieved your desired color, rinse the hair & shampoo to remove any color residue. Do not condition if you plan to apply a mask.

WhatsApp: 079 856 3614

#### Bleach & Color

Special**One**Color<sup>®</sup> Semi-Permanent Masks can be used to enhance an existing shade in the hair or to change the shade in prelightened hair. Create unlimited shades by mixing any of the Special**One**Color<sup>®</sup> masks together to create any custom shade you desire. The 000 mask is used to dilute more intense masks shades & create pastel colors.

#### SpecialOneColor<sup>®</sup> masks:

Unlike other direct dyes, SpecialOneColor<sup>®</sup> masks contain a special alkaline agent which allows the pigments to penetrate the hair cuticle & adhere to the hair for longer-lasting results.

SpecialOneColor<sup>®</sup> masks do not require developer. When formulating, simply choose the desired color masks & apply directly to the hair. Do not add developer to your formulation.

If hair has been previously lightened or decolorized, SpecialOneColor<sup>®</sup> masks can be used without Bleach&Color<sup>®</sup>.

#### HOW TO USE:

Choose your desired mask shade(s). If mixing more than 1 mask together, make sure to mix well to ensure even color distribution. Apply the mask to pre-washed, towel dried hair. Process for 15 - 20 minutes, then thoroughly rinse, shampoo & condition the hair. For optimal results, use on hair that has been previously colored with BLEACH&COLOR<sup>®</sup>.

#### Color Stabilizer pH 3.5 Spray 230ml:

pH 3.5 spray is the final step in the system. It prevents the hair color from fading, seals the cuticle & leaves the hair shiny & soft. It is imperative to use the pH 3.5 spray to extend the life of the color, keep the cuticle smooth & the hair shiny. The pH 3.5 spray is also an excellent product for clients to use at home in order to keep their color vibrant & shiny between appointments.

#### HOW TO USE:

After shampooing, apply pH 3.5 spray to return the hair to its natural pH & close the cuticle. For best results, spray on clean damp hair & use a wide tooth comb to evenly distribute the product after every shampoo, then proceed with styling.

#### Bleach & Color

Bleach

Ø

#### How do you use this system? For example:

 If your initial base colour is a level 4, using any one of the 16 BLEACH&COLOR<sup>®</sup> permanent shades achieves the target base color shown on the right-hand side. Assuming you used champagne (13197), this is the effect:

Bleach & Color

- 2. If you want a more intensive colour, choose any of the 18 SPECIALONECOLOR<sup>®</sup> semi-permanent shades or a combination of different colours to achieve any one of the 10 results shown:
- 3. Once the Bleach & Color<sup>®</sup> is fully processed, the resultant base colour may be altered and/or enhanced with one or a formulation mixture of Special**One**Color<sup>®</sup> Masks as shown below. Other makes of fashion colour lines require pre-lightening to a light blonde shade in order for the fashion colours to show up, however, when the colours fade, the base they fade to is usually an uneven, & sometimes "washed out", leaving an undesirable tone. With Bleach & Color<sup>®</sup> the new base colour is permanent, which means the mask shades will always have those base tones to adhere to, & will never fade to those uneven & undesirable tones.

Remember, depending on the initial colour, condition, & texture of your client's hair, the colour you achieve using the Bleach&Color<sup>®</sup> may not be your exact target shade, however, the Special**One**Color<sup>®</sup> masks give you the creative freedom to create & enhance any shade.

# COMPAGNIA DEL OLORE®

#### Made in Italy

CDC is well known for its quality & extreme variety of high technology colours. You can choose from 130 different colours, making it the widest range in the world & allowing you to really express your creativity & satisfy any of your customer's requirements. CDC colouring cream formula has the lowest possible level of ammonia thanks to the use of **Pure Micro Pigments** which guarantee deep penetration of the colour molecule with the minimum disruption to the hair's natural structure.

- Great & consistent colour results whilst respecting the hair: the natural ingredients used guarantee uniformity of colour, brightness, shine & long-lasting properties, also making the hair silky & soft
- 100% Grey coverage power
- Lifting power: 1 to 4 tones with higher lifting from the super lightening shades.
- Cost effectiveness: all colours are packed in 100ml tubes with a mix ratio of 1 part
- colour to 1.5 parts developer, allowing up to 3 applications per tube • Easy to use: the particular emollient qualities of the ingredients & the mix ratio make
- the colour easy to apply, spread & rinse out
- Environmentally friendly: the colour is low in ammonia & bio-degradable
- The coloring cream combines two precious ingredients: Orange butter & Honey. Orange butter has anti-oxidising, UV protection, anti-pollution & anti-age properties, while honey is nourishing & hydrating for cuticles & gives elasticity, body & shine to hair

## hair health & beauty

#### **BY POPULAR DEMAND - CDC CREAM PEROXIDE**

With 79 shades & 6 Colour Intensifiers across 16 tonal families, the results are endless. From Dark Chocolates & Vibrant Coppers to Superlight Blondes, extensive colouring options & easy application allows serious colourists to express their creativity & versatility.

The micro-sized Osmo Ikon Colour molecules are easily absorbed in the hair cuticle, allowing for a far lower ammonia content in the formula. Hair conditioning is significantly improved. MCT molecules are locked into the cuticle, providing longer-lasting colour clarity, complete grey coverage & multi-dimensional shine.

| Improved. MCT molecules are locked into the cuticle, providing long |       |
