For the first time ever ... the science of FiberHance™ strengthening technology combined with natural phytonutrients of plant-based ingredients to bring you the ultimate reparative, strengthening & nourishing, professional hair care line.

ANTI-COLOR FADE • NO SULFATES, PARABENS, OR DYES

The formula is made of three key ingredients:

1. Hemp Seed Oil - Benefits of Hemp:

The health benefits of Hemp Seed Oil comes from its excellent ratio of omega-6 to omega-2 which are needed in stimulating hair growth. It helps rebalance the moisture level of the scalp & hair to smooth the hair's surface & prevent dehydration. This ingredient makes hair look shinier & stronger by improving the health of the hair follicles to prevent hair loss. For healthy hair, some amount of moisture must be introduced & maintained. Hemp oil prevents water loss by injecting moisture into the hair & scalp. In addition, it is easily absorbed by the scalp & hair so it does not get sticky & leave a mess.

2. Red Wine Extract (Resveratrol) - Benefits of Red Wine:

Red Wine Resveratrol is a stilbenoid which is a natural Polyphenol that is 20 times more powerful than Vitamin C & 50 times more powerful than Vitamin E. Resveratrol helps grow Keratin which prevents the degradation of hair protein. It protects the

scalp & hair from free radicals & helps make hair color more vibrant & alive by restoring strength, luster & shine. Because of the ultra-high levels of polyphenols, this property combats the aging & cellular breakdown of healthy cells by removing & stopping free radicals from damaging cell membranes & attacking proteins. Since red wine contains bioflavonoids, this ingredient helps in the growth of Keratin & prevents degradation of hair protein.

3. FiberHance™ - Strengthening Technology

What is FiberHance™?

The a-helix protein structure in the hair fiber is what provides strength to the hair. In weak hair, the bonds are broken & missing. FiberHance™ BM solution is a small molecule in which the chemical structure & dimensions have been specifically designed to optimize multi-bond interactions within the hair keratin cortex. This builds new bonds with & across the hair structure because they are dual mechanisms!

Benefits of FiberHance™:

FiberHance™ is a bond multiplier for hair strengthening. It derives from glucose-based chemistry & has a unique multifaceted mode of action, which helps penetrate deep into the cortex. This creates new hydrogen & ionic bonds which supports the damaged internal keratin structure to strengthen & provide manageability back to the hair.

ARGAN VELVET™ - LUXURY HAIRCARE, "No more Oil, Now it's Cream"

Oil: The Tradition

The extraordinary nourishing, smoothing, shining & rejuvenating properties of Argan Oil are renowned & have been treasured for generations. The oil molecules are considerable in size & are absorbed by the hair & skin only on a superficial level

Cream: The Revolution

Argan Cream is superior to the oil, because:

- the beneficial nutrients penetrate deeper into the hair fibre & are more effective due to their smaller molecular size
- it has more precision & control during application
- it is non-greasy & does not leave any residue
- it is perfect for all hair types, also for fine hair

The result is Argan Velvet

A 100% organic Argan Oil & other precious ingredients have been ultra-refined, reducing their molecular size to **1 micron**, resulting in a **velvet Argan cream**

What does it do?

- it nourishes, moisturizes & smoothes hair without weighing it down
- it enhances & protects the colour giving extreme shine
- revitalizes the cellular structure of the hair
- controls static & eliminates frizz
- repairs split ends
- protects the hair from atmospheric aggression & heat from styling tools

To be used on damp hair or on dry hair
